Carbon Reduction Plan

Supplier name: ...John Weaver Contractors Ltd.....

Publication date: 03/07/26.....

Commitment to achieving Net Zero

John Weaver Contractors Limited is committed to achieving Net Zero emissions by **2050**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
Baseline evidence base on scope 1 & 2 plus included scope 3 emissions	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	11.42
Scope 2	5.57

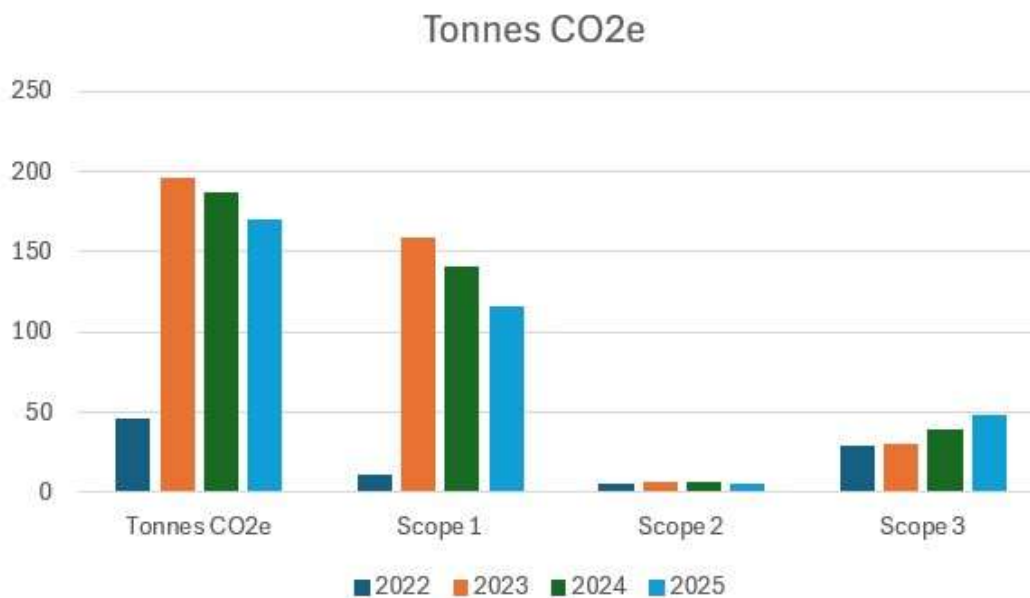

Scope 3 (Included Sources)	28.76 (Included Sources - Head office Commuting and Water Consumption)
Total Emissions	45.76

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	116.15
Scope 2	5.88
Scope 3 (Included Sources)	47.798(Included Sources - Head office - Commuting, Waste and Water Consumption)
Total Emissions	169.84

Statement

We identified an error in our 2022 original baseline report spreadsheet which meant that original figures reported were much higher than actual. We have therefore rectified the error and recalculated 2022 statistics using 2022 CO2 datasets. In 2023, we developed more accurate data capture for company vehicle emissions which has resulted in an increase in Scope 1 data reporting. Similarly, the Scope 3 reporting has been expanded to include waste sources which has increased the volume of emissions.

Emissions reduction targets

Our overall target is to be Scope 1 & 2 carbon neutral by 2030 and Scope 3 carbon neutral by 2050. We have a plan in place to increase the scope of our Tier 3 scope accounting in the coming years and therefore it is likely that in the short term reported emissions will increase as the scope increases.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction initiatives to meet targets.

- ISO14001 accredited environmental management system
- Head office efficiency including LED Lighting upgrades, boiler replacement, radiator replacement
- Installation of electric car charging points
- Aim to transition vehicle fleet to hybrid and electric models over the coming years, replacing vehicles with greener alternatives as they become due for renewal
- Site accommodation EPC A Rated
- Mandatory Site Waste Management Plans (SmartWaste)
- Staff and workforce training including SEATS, SmartWaste
- Changed to a carbon neutral electricity supplier

Ongoing improvements (planned or in progress)

- Green Transport Plans
- Further improvements to our head office building to reduce consumption including solar panelling and window upgrades
- Supply chain improvements - including fuel, plant, equipment
- Carbon offsetting

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting². Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of the Supplier:

Nathan Davies, Joint Managing Director

Ceri Best, Joint Managing Director
